

## Repository

https://github.com/ddhernandezf/AG\_LiveCoding.git

## Overarching Approach

1. We need to clone the branch **NetDevEDDY202401**.
2. Based on this branch we need to create a new one with the following naming standard: **NetDevEDDY202401\_{YOUR FIRST NAME}{YOUR LASTNAME}\_{YYYYMMDD}**
3. Work on the requirements.
4. Commit and push your changes.

## Assessment Points

- Following instructions.
- Quickness of solving problems.
- Creativeness of solution.
- Usage of Git.

## Topics we should skip

We could speak out about these once we had solved the problem.

- Architectural and pattern implementations.
- Performance and best practice.
- Code quality.

## Requirement

**Estimated solving time: 20 minutes.**

This view displays a number list from 1 to 100, if you click on the **Reload** button you will refresh the view and the number list as well.

EDDY202401

Total records:

1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100

Reload

### What do we need you to do?

We need a new button that removes three random numbers from that list every time that we click the button.
